

As a U.S.-based manufacturer with global supply chain partners, many of our products are subject to wide ranging and rapidly changing tariffs. Some items are not subject to tariffs while others may have a 130% plus cost impact. Unfortunately, it is not possible to update each of these on a daily basis. In the event of a price discrepancy on an order you place, we will contact you promptly so that you have the opportunity to accept the applicable tariff or cancel your order.

Professional ratchet crimping tool for 75 Ohm BNC connectors and Mini-BNC connectors on RG59HD, RG6HD, and RG59HD Mini (Belden 1855A, 1505A, 1694A Nemal 1191, 1570, 1580)*. The Nemal CT1000HD is a

rugged, heavy duty crimper with multiple hex sizes, and a must for any broadcast technician's tool kit. Ultra-smooth, fully ratcheting crimp cycle with built-in safety release.

Optional Interchangeable die sets manufactured using heat-treated steel for long life. Soft, rubber-embedded handles. Long lasting tool that delivers over 50,000 crimp cycles. Rugged, double-plated jaw design to increase life span. 10-year warranty. Angled head to prevent awkward wrist bending during operation. Reduced handle grip distance makes it easy for both small and large hands. Higher crimp force produced with less hand force so hand doesn't tire as quickly.

No breakover hand-force -the effort required by most crimpers to make the last click at the end of the cycle to complete the crimp- the CT1000HD does the work. Manufactured using the newest fine blanking technologies. EZ-Change die screws make changing die quick and easy -no screwdriver required.

***Please check specific crimp sizes for your connectors. These sizes may vary by manufacturer**

Die Sizes:

Center Pin: .068" and .041"

Braid Crimp: .178", .255", and .278"
